How to ensure you dont hear, "We dont need it." Why what youve probably heard before about objections is bogus, and what you should do instead. Thats ALL bunk!) Successfully Following Up By Phone How to end a call to ensure success on the follow-up. How to avoid starting follow-ups with the useless and idiotic statement and question, "I sent you out the material. Didja get it? Any questions?" What you should and shouldnt mail after calls How to set solid phone appointments so theyre ready and waiting for your next call Case Studies of Actual Calls See actual transcripts from calls submitted by fellow sales reps in the field, or calls received by Art. Youll see what didnt work and why, so you can avoid the same mistakes, and suggested alternatives to get success and agreement. Some of the cases include, What to say when they "buy it locally" Failed prospecting calls, and why they went down in flamesneedlessly Why ending a call with "Keep us in mind" is asinine, and what to say instead How to position value instead of selling on price How to build relationships with regular customers to keep their loyalty Prospecting How to get referrals who are eager to speak with you Getting them talking whey they say theyre not interested Why leaving messages on prospecting calls could be a waste of time Over 20 other prospecting pointers to help you get interest, the appointment, and eventually the sale Even More Stuff to Help You Sell More Why believing that using the phone is "Just a numbers game" will demoralize you and ensure call reluctance The right way to use conference calls to sell to multiple decision makers How to handle prospects who "Need information sent right now!", and determining if theyre for real, or just yanking your chain How to keep customers after that first sale Positioning yourself as the "least risk vendor" instead of the higher-priced vendor Telesales lessons from the O.J. trial Brief Teletips Over 130 brief, to-the-point tips you can use right now. Any ONE of these could pay for the book on your very next phone call, or help you avoid a mistake that could cost you more than the price of the book! Some examples: How to respond to the "Send literature" request Eliminating telephone tag What to say to the prospect who perpetually strings you along Showing them how a lower price might actually be more expensive Why they dont care about your products or services, and what they do care about which decides whether or not theyll buy

I've read over 500 books on selling, persuasion, and influence. This is the best book on telesales that I've ever read. It's in my top 5 sales books of all time. Initially I thought the book was expensive..., but after I read it, I realized it's worth 50 times what I paid for it!

I bought How to Sell More in Less Time with No Rejection Volumes 1 & 2. They not only have very practical applications that I use, but is also a breath of fresh air compared to the hard sell approach, characterised by some 'famous' authors. I have a lot of corporate clients, and if I used the hard sell approach, I would be laughed out of their office. I recommend anyone in sales get these books

This book has some sensible advice and workable techniques for persuasive and profitable telephone communications that you can use right away, regardless of your industry, particularly if you rely on cold-calling to get that appointment. The sections that I've found helpful include developing a selling telephone image, how to avoid language that sounds "salesly" or threatening, leaving voicemail messages that have impact, how to deal with screeners to get to the correct decision-makers. Even better are the templates that you fill in, depending upon your product or service, to stimulate interest at the beginning of your call, using a recommended menu of words and phrases (this was invaluable for me). Other sections I have dog-eared include setting appointments over the phone, handling follow-up calls, dealing with different objections, and some great closing ideas. A great investment.

There's so much "exactly-how-to-do-it" information that I wish there was an audiocassette version

so I could listen while I'm driving. The techniques are really new and unique, not just rehash of old stuff I've seen before. I can't count how many times I've picked up a book that I thought was new only to be disappointed - like an old record that skips! The author broke new ground here and has given us readers an edge over the competition.

"The examples are very easy to incorporate into any one's sales process right out of the books. These ideas will help any sales person communicate more effectively with clients, prospects, and even co-workers and family. The tools in these books can be utilized by the newest member of your sales staff, and even teach some of those old dogs new tricks. With everything from creating opening statements to the quickest way to a strong confident close, "How to Sell More in Less Time with No Rejection, Volumes 1 and 2," are simply by far, the best most practical easy-to-use sales books I have ever read."
