For The Love Of A Dog: Understanding Emotion In You And Your Best Friend

Synopsis

The critically acclaimed author of "The Other End of the Leash" offers fascinating insights into the canine mind-critical tools for a healthy relationship with a well-trained dog. In this remarkable book, renowned canine expert Patricia McConnell answers the questions of dog lovers everywhere. Do dogs have emotions like we do? More to the point, does my dog love me? Such questions have fueled bestsellers like Elizabeth Marshall Thomas' *The Hidden Life of Dogs* and Jeffery Moussaieff Masson's *Dogs Never Lie About Love*. Sharing riveting dog stories from her experiences, Dr. McConnell also offers accessible science that clues readers in to what's going on behind those puppy dog eyes. We learn the fascinating similarities and surprising dissimilarities in dogs' and humans' brains, and how current scientific studies have led McConnell to conclude without a doubt that dogs share a profound emotional life with us. The information found in this book will help readers have better-trained dogs, at the same time deepening their dog-human connections. *For the Love of a Dog* is a must-have for dog lovers everywhere. "Highly recommended..."-library Journal Starred Review --This text refers to the MP3 CD edition.

Customer Reviews

Patricia McConnell has written a wonderful book filled with engaging stories and much practical advice for dog owners. She incorporates the latest research findings on the workings of the dog's mind in presenting her own cases from her behavior counseling service. Her discussion of counterconditioning covers an extremely valuable concept that is not stressed (or even utilized)

enough by other behaviorists and trainers. This technique is invaluable and of nearly limitless potential in alleviating many emotional distresses and disorders in dogs. Especially pleasing to see is that in her discussion of counterconditioning and other techniques the author diverges from the decades-old approach of addressing "behavior problems" (a term that should be killed off and unceremoniously buried - it's not the animal's problem any more than if your husband had a habit of talking too loudly to your liking would you tell your friends that he had a behavior problem) by focusing on simply eliminating the behavior. This mechanistic behaviorism approach may be effective in eliminating the behavior but frequently does nothing to relieve the dog's underlying emotional distress that is causing the behavior. For example, if a dog is suffering from loneliness because he is tied up alone in a backyard and barks endlessly for human attention and companionship there are plenty of ways to eliminate the barking. But there is only one correct one: alleviate the emotional pain of loneliness. McConnell understands this and focuses on this underlying emotional distress when working with the dogs to change unwanted behavior.
