Working With The Law

Synopsis

Science has defined a variety of natural laws that explain the physical world and how it changes. One such law states that for every action there is a reaction, and that for every motion there is corresponding counter-motion. Whether it's visible to the human eye or not, one thing is certain, movement and change will occur as a result. Having studied these principles, author Raymond Holliwell not only understood the universal physical applications, he also understood the spiritual and mental applications as well. By using this law on a spiritual and mental level, Holliwell found that a specific thought could create a desired reaction in his personal and professional life through continual and dedicated practice. As he came to realize the expanded potential of this powerful law, he eventually recognized the ultimate source of the dramatic results - God. There are countless laws that impact on our daily lives and actions. But there are other laws just waiting to be discovered and put to work from within laws that anyone can use to live a limitless and prosperous life. After many printings, the lessons in WORKING WITH THE LAW are still being taught in numerous workshops around the country and continue to provide the listener with a new opportunity to take action and re-think their strategy for success by simply working with the law.

Customer Reviews

This book is an excellent work which will benefit anyone. However, Wilder Publication, which put out this copy, has engaged in copyright theft. The book was published in 1939 as listed by the copyright office. It was registered to DeVorss and Company which publishes his works. The people who put out this edition have done such a sloppy job that they can't even spell the word 'attraction" correctly.

See the cover as shown above. They spell it as "attracktion".They even have the nerve to list it as copyrighted by them in 2009! Thus, they claim below, no one is permitted to even quote from it without their permission.The DeVorss edition keeps all of the original paragraph numbering and other aspects of the original.<http://www..com/Working-Law-Raymond-Holliwell/dp/0875168086>This edition is in tiny type and hard to read. There are numerous typos. The book is filled with other errors.The book deserves a wide readership but not from pirates who return nothing to the Estate of the author.As an author whose material has now been stolen and given away in torrents on the net by pirates, I urge all of you to support the authors and their legal representatives.

Among the many books, articles, and speakers I've read or listened to that cover the law of attraction, Working with the Law would've been chosen first had I known what I do now---it is by far the most brilliantly precise (and concise) foundation book handling this wonderful subject.This is not particularly a "How-To" book. Instead, Mr. Holliwell has provided more of a philosophical book that should set the mental springboard necessary to read the other books that any lucky reader will undoubtedly be reading in his or her journey of self-discovery.It's a quick read, in general, but one will want to ponder the numerous points each short "Law of ..." section provides. In all my books, I highlight and scribble notes in sections that I find most useful. I had a difficult time holding back the pen because much of this well-thought out book deserves to be committed to memory.

I am very pleased that I purchased this book. It is not a book you can, or is meant to be read one time to have a full understanding of the information contained. I have read it 4 times now and get something new out of it each time I read it. I also feel better, calmer and more confident about myself after each reading. I highly recommend this book to anyone who is working on the LAW of ATTRACTION.

While this book is just another treatise on a form of metaphysics, the editing is just awful! Mispelled words, wrong words...you have to be very careful reading it & do your own interpretation in some instances to determine what the actual word in the sentence was intended to be. Anyone who studies this subject would do well to spend their money on other works. This one has some merit but won't tell you anything you probably don't already know...and the poor attention to proper & correct printing makes it even less desirable...this one is not a good investment of your time or money.

A book for those who desire to be disciples of success in this life and in the hereafter. So much of this has been left out of the teachings of the church, it's no wonder we are weak and ineffective. Looking forward to teaching this!

Believe me when I say this but this book resonates with the truth of how you should behave and think. It is obvious amongst most members of society to behave in a certain way to achieve certain goals. This is not nuclear science here - this is the raw facts. You get what you think or do. Obviously. This book just makes you reexamine and apply the methods that could make you successful in life. You just need patience - which a lot of people in this technological age do not have. Just because a computer can connect you to the internet in a few seconds does not mean that you will achieve your goals in that time frame. You must apply a continue stream of positivity and thoughtful actions towards your good manifested goals. It is all inside of you NOT someone else. It all comes down to you. Simple but true.

Raymond Holliwell has provided a great tool with, "Working with the Law", describing the laws of attraction as the principal laws of our human experience within the universe. I see a strong parallel with the laws of the Bible --which he refers to, but not often. This book will remain one of my all-time favorite go-to reference works; and I cherish it. What I regret, however, is that there is not more information published by (or about this wise man. A note to the reader: be patient with mis-spellings, etc.

As a law of attraction student, I'm always interested in obtaining greater insights into the law. This book was written by a preacher and has lots of religion in it. It reads a lot like think and grow rich gets married to the bible. The author tends to drone on in an old school moralistic style. I found it boring and not useful. Reading it lowered my vibe. A truly inspirational old school book on the law is "The Key to Yourself" by Venice Bloodworth. And of course the Abraham Hicks material and Feel It Real are really foundational reading for a modern understanding of manifestation principles.
