Customer Reviews

I bought this book because it says Link Building Strategies in the title. In the whole book you can't find a single strategy!!! What is a strategy? Strategy is a high level plan to achieve one or more goals under conditions of uncertainty, which include several subsets of skills including "tactics", siegecraft, logistics etc. An example of strategy in this book is strategy called Consistency and it is explained like in the following way: "Google and most other advanced search engines have the capability of detecting if a website is committed to a backlinking scheme or not. ... Search engines would want to see that a webmaster grows his network of inbound links regularly over a normal span of time. This

may include the addition of a certain number of backlinks per day or week."This is not a strategy. This is only well known recommendation.

Another great book full of information I felt like I could get tight to work on. Worth way more than I paid.

I got the audio edition. It is only 32 minutes long. Too short. Lacks detail.

Absolutely awesome book!
