I'm a writer and I started this kind of career three years ago. However, I only focused on writing general articles. There's a rising demand on copywriting jobs and I tend to fail them or give up doing them because I can't really write a good one. I tried looking for ways, but the

internet is so big, that it really gets me overwhelmed, I don't know which one I should choose. So, I considered this book, took my time reading it and it worked wonders. I tried to apply for a copywriting job offer and I'm glad I made it! I was hired and I'm doing a great job (according to my manager). This book honed me to become one!

I really learned a lot with this book. There are so many examples of excellent material used in the past and present, as well as some major mistakes companies have made in copywriting. The examples show details of what is good and bad about the advertisements, as well as the techniques you have to think about. From studying your competitor's products, to motivating buyers to use your product above all others, this book is an excellent source of information.

But, still the book did what it promised. Now, I'll be able to start doing copywriting works. Thanks to the author. I really liked this book. It did a competent job of fulfilling the promise of the title, so the content was good, and appropriate. And it was well-written too - no grammatical errors, formatting errors, or anything like that - so it was easy and interesting to read. I would easily recommend this book to anyone who wanted to learn more about copywriting or about how to become a copywriter.

As a blogger and internet marketer I know that copy writing is just as important as the actual quality product I'm promoting. This book really did a good job of diving into the different types of copy writing, how they each are different, and then how to actually write for that specific style. There was a lot of different styles I had no clue about and it was interesting to learn how I could use each of

them to my advantage as I promote and sell my products. Very good resource
